

# Chicago Tube & Iron finds quick ROI with Infor Consulting Services

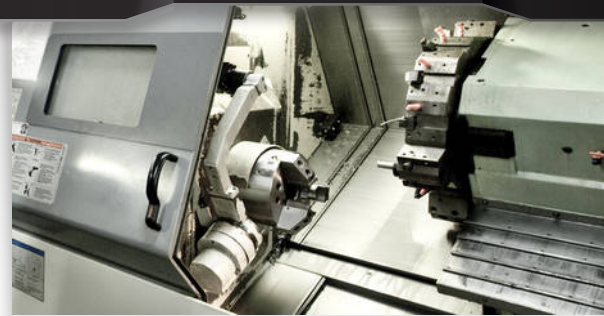

## Challenges:

- Eliminate year-end blackout periods and allow multiple fiscal periods to be open simultaneously.
- Simplify report writing for post-close reporting.
- Provide extensive visibility into operating data with ongoing financial data management.
- Add more dashboard reporting for management.
- Make it easier for accounting staff to post to general ledger.

## Benefits:

- Accelerated implementation with the Infor consulting team's involvement—in three weeks, including project design, software installation, system build, and integration.
- Simplified close of fiscal year-end with multiple fiscal periods open.
- Reduced preparation time for CFO monthly report by 40%.
- Reduced ad hoc reporting time from two days to a few hours.
- Improved usability for all accounting staff.
- Added ability to monitor financial and operational data performance every day and make adjustments.
